File photo

FLINT TOWNSHIP, MI -- Three body armor vests and a Taser are back in police hands after they were stolen from a unmarked police car last week.

The items were stolen March 5 in the parking lot of a Leo's Coney Island on Miller Road.

A security camera showed the suspects drive away in a dark blue early 2000s Dodge or Chrysler minivan. Flint Township police and Genesee County Sheriff's Department investigated the incident.

Police also recovered stolen property from other larcenies from automobiles at a residence.

Three people are in custody and police say two others may also face charges.

Genesee County Undersheriff Chris Swanson said the vehicle belonged to a Mundy Township officer who was part of the sheriff's Genesee Auto Theft Investigation Network (GAIN).

The suspects allegedly broke out a window and stole the items while the officer was inside eating, Swanson said.

I'm glad all the equipment was recovered, but I'd like to know the "rest of the story"... Which departments vehicle was it and will there be any discipline levied if in fact there was misconduct on the officers part? The fact that the article stated that it was being investigated by both Flint Twp AND the Genesee Co Sheriff makes me believe that it was a Sheriffs car - Leos is IN Flint Twp., so it makes sense that THEY would investigate that... but why the Sheriff, unless it was one of his unmarked cars? and why did one car have so many vests in it? I've known some officers in the past and it used to be one car, one officer, one vest... unless they were out on a raid or something... now Leos has pretty good food, but you don't have to kick the door in to get it!!

Tie a string around that officer's finger so they will remember to lock the vehicle in the future. Wonder how many other officers forget to lock up the vehicle with all those weapons inside?

Hold your horses Shane, nothing in the article said if the "unmarked" car was locked or unlocked. But but did mention that police recovered other property for other auto break in thefts. Sounds like who ever did this knows how to do it , locked or unlocked.

Are you saying the Flint Journal omits crucial facts from their stories?

The article also didn't say that a pink elephant was in the back seat, but I am not jumping to the conclusion that there was.

The press release did not say how entry was made. I'm trying to gather more information.
