ThorShield Energy Weapon Protection Fabric is the most effective protection against non-lethal energy weapons on the market today. The fabric is integrated into body armor, uniforms, gloves and additional items. The ThorShield lining is a highly conductive specialized layer of fabric, which prevents the flow of electricity from energy weapons such as Tasers, cattle prods, stun guns and similar devices.

ThorShield protective clothing ensures that the electrical current conducts through the fabric versus the body, protecting the wearer. ThorShield products are only sold to law enforcement and military personnel.
